

Miyuki Rocailles to Matsuno

Preview edition, free. Colors come from retailer photos, not measured beads, and our Matsuno color list is incomplete (126 colors), so 86 of 238 colors here have no good match. Every match uses real catalog numbers and a published color-difference method (CIEDE2000) that accounts for finish. Check a match against real beads before buying in quantity.

Screen and print colors vary. Match by eye against your beads when it matters.

How to read this chart

Excellent Hard to tell apart side by side (difference 0 to 2).

Good Visible side by side, but usually acceptable (2 to 5).

Fair Clearly different side by side, but works as a substitute (5 to 10).

Poor Noticeably different (over 10). If nothing is within 10, the row says No close match.

Measured Colors checked against real beads or published by the maker.

Close to Colors estimated from supplier photos.

Approximately Colors estimated from the color name. Check against your beads.

dE00 is the CIEDE2000 perceptual color difference; lower is closer. The first candidate is the recommended one. Matches are made within the same finish where possible. A different finish is labeled and never rated better than Fair.
